(a) dispersion relation
growth rate ω_i
wavenumber α
Rayleigh (inviscid)
Orr-Sommerfeld, Re = 1000
simulation
(b) growth from the eigenmode; dashed: $e^{\omega_i t}$
mode amplitude $A(t)/A(0)$
time t
$\alpha = 0.150$
$\alpha = 0.443$
$\alpha = 0.850$
